SUMMARY

Software Engineer specializing in Backend Development with PHP and Laravel. Over the past 4+ years, I have contributed to the design and development of 10+ production applications, delivering scalable APIs, optimized database solutions, and robust business workflows. Experienced in software design principles, system architecture, cloud integrations, and cross-functional collaboration, with a strong commitment to code quality, performance, and continuous improvement.

PROFESSIONAL EXPERIENCE

<i>Feb 2023 – Feb 2026</i>	Backend Engineer (Full-Time) @ Art4Muslim	<i>Nasr City</i>
	Developed and scaled core backend features for large-scale applications using PHP and Laravel, implementing SOLID principles to reduce code technical debt. Optimized complex MySQL queries and integrated Redis caching to enhance system reliability, decreasing page load times during peak traffic. Built and integrated robust RESTful APIs for external cloud workflows, utilizing AWS S3 for secure file storage and asset management.	
<i>Sep 2022 – Feb 2023</i>	Backend Engineer (Full-Time) @ OFX Advertising Agency	<i>Maadi</i>
	Developed backend business logic and modular features using PHP and Laravel to support diverse operational requirements. Enhanced database integrity and application reliability by optimizing SQL schemas and designing secure API integration endpoints. Collaborated closely with cross-functional technical teams to deliver customer-facing features on time, maximizing overall development efficiency.	

FREELANCE & INDEPENDENT PROJECTS

<i>Jan 2022 – Present</i>	Full Stack Engineer (Freelance) @ Cloudy Digital Solutions	<i>Giza</i>
	Built customer-facing application modules by connecting Laravel backend APIs with dynamic Vue.js and Inertia.js frontends. Streamlined local development and production environments by containerizing applications using Docker and configuring Nginx servers. Managed collaborative code releases using GitFlow and Git, reducing deployment conflicts across team workflows.	

EDUCATION

<i>Graduated: Jan 2022</i>	Bachelor of Computers and Artificial Intelligence, Cairo University
	Graduated with a strong foundation in Software Engineering, Data Structures & Algorithms, Database Systems, Artificial Intelligence, and Computer Networks. Developed expertise in problem-solving, software design, and application development through academic and practical projects.

SKILLS

Backend & DB:	PHP, Laravel, RESTful APIs, Auth, MySQL, PostgreSQL, SQLite, Redis, DB Design & Optimization
Frontend:	HTML, CSS, Bootstrap, Tailwind, JavaScript, jQuery, TypeScript, Vue.js, Inertia.js, Vite
Software Engineering:	OOP, SOLID, Design Patterns, Data Structures, Algorithms, System Design, Problem Solving
DevOps, Tools & OS:	Docker, AWS S3, Nginx, Apache, Git, GitFlow, GitKraken, Postman, Composer, Linux/Windows CMD
